## **Race:**

You must choose to be either a Human, Dwarf, Elf or Qunari.

### **Human - Free**

Humans are the most numerous, yet also the most contentious, of all the races of Thedas. Only four times have they ever united beneath a single banner, the last being centuries ago. The monotheistic faith of the Chant of Light plays a major role in human society. The majority of humanity in Thedas descended from numerous human tribes.

### **Elf - Free**

The elves are a slender humanoid race with a lithe build, large eyes, and pointed ears. Long ago, the elves were the dominant race on Thedas, and their advanced civilization was based on nature, the Fade, and magic. Modern elves have lost most of their cultural heritage and identity. They attempted to rebuild their society in the Dales, but are a scattered society.

### **Dwarf +200 CP**

The dwarves are short, stocky, skilled builders, who boast a long tradition of courage and martial might. They once developed a vast underground empire of twelve great Thaigs that spanned the breadth of Thedas. However, their world was all but destroyed during the First Blight, as their millennia-long battle against the darkspawn has caused their race to decline.

### **Qunari +600 CP**

The Qunari are a metallic-skinned, usually horned race of large humanoids said to be descended from dragons. Their society is governed by the teachings of the Qun, a pseudo-religious philosophical text that dictates all aspects of life.

Anyone who has followed the Qun since birth is known as a Qunari regardless of race, though members who are born outside the Qun or were born into the Qun but reject it are not considered to be Qunari but are instead called "Vashoth".

## **Class:**

There are three classes – warrior, rogue, and mage. Humans and elves can be of any class, but dwarves are unable to be mages.

### **Warrior**

Warriors are the front-line fighters, the backbone of any party under assault. They rely on melee and ranged weapons, supplemented by powerful special abilities that draw from deep reserves of stamina. They can withstand and deliver a great deal of punishment, and have a strong understanding of tactics.

### **Rogue**

Rogues are crafty combatants who succeed in battle by combining speed, subterfuge, and a wide range of abilities to bring their opponents down in unexpected ways, sometimes before the enemy even perceives danger. Rogues can pick locks with great skill, disarm traps, incapacitate enemies with ease, or sneak up on targets to deliver a devious and crippling backstab.

### **Mage (Incompatible with “Dwarf”)**

A mage is able to interact with the forces of magic, using different elemental powers. Dwarves cannot be mages, since they are unable to connect with the Fade and therefore are unable to control the forces of magic. Most elven mages are assumed to have come from an alienage, as Dalish magi stay in their clans, sometimes becoming the keeper.

## **Origin:**

If you have chosen the **Qunari** Race, you may not select an Origin.

### **Human Noble (Requires “Human”)**

Born to wealth and power second only to royalty, you find your training in both diplomacy and war put to the test when your father's castle is betrayed from within on the very night your elder brother leads the family's forces to war.

### **City Elf (Requires “Elf”)**

You have always lived under the heavy thumb of your human overlords, but when a local lord claiming his privilege with the bride shatters your wedding day, the simmering racial tensions explode in a rain of vengeance.

### **Dalish Elf (Requires “Elf”)**

Proud of your role as one of the last 'true elves', you have always assumed you would spend your life wandering with your clan... until a chance encounter with a relic of your people's past threatens to tear you away from everything you've known.

### **Magi (Mandatory with “Mage”)**

Gifted with a power considered dangerous by most, you have spent most of your life secluded in the remote tower of the Circle of Magi to be trained and watched closely by the dreaded Templars. Now your final test is upon you—succeed and prove your strength or be slain.

### **Dwarf Commoner (Requires “Dwarf”)**

Born casteless in a land where rank is everything, bound as the lackey and thug of a local crime lord, you have spent your life invisible until chance thrusts you into the spotlight, where you can finally prove whether you will be defined by your actions or your birth.

### **Dwarf Noble (Requires “Dwarf”)**

The favored child of the dwarven king, you proudly take up your first military command... only to learn that the deadly intrigues of dwarven politics can pose a greater danger than even that faced on the battlefield.

A vile epithet attracts the ire of all enemies nearby, drawing them away from their current targets and toward you.

### ***DA Keep Booster: Massacre***

## **Warrior Specialisation:**

These Talents can only be taken by those with both the **DA Keep** and **Health** Perks.

### **Berserker -2 TP (-1 TP for “Dwarf”)**

#### ***DA Keep Booster: Berserk***

## **Templar -2 TP (-1 TP for “Human”)**

Mages who refuse the Circle's control become apostates and live in fear of a templar's powers, as they have the ability to dispel and resist magic. As servants of the Chantry, the templars have been the most effective means of controlling the spread and use of arcane power for centuries.

### ***DA Keep Booster: Righteous Strike***

The templars are enforcers specifically designed to control and slay mages. Each of your melee attacks against an enemy spellcaster drains them of their mana.

### ***Health Booster: Cleanse Area***

You can purge the area of magic, removing all dispellable effects from those nearby. Friendly fire is possible.

### ***Constitution Booster: Mental Fortress***

You have learned to focus on duty, gaining a large bonus to mental resistance.

All affected enemies are stunned or knocked back unless they pass physical resistance checks.

### **Guardian -3 TP (-1 TP for “Dwarf”)**

### **Spirit Warrior -3 TP (-1 TP for “Elf”)**

Although spirit warriors employ magical abilities, they are not mages; instead, they flirt with inhabitants of the Fade who agree to augment mortal abilities in exchange for a glimpse of the physical world. Naturally, the Chantry's templars rarely acknowledge that distinction.

#### ***DA Keep Booster: Beyond the Veil***

You don a cloak of mystical energies from the Fade in order to evade a substantial proportion of physical attacks, but this Perk drains stamina constantly. If you have **Soulbrand**, your attacks all deal spirit damage, bypassing enemy armor.

#### ***Health Booster: Soulbrand***

You have gained a deeper connection to the spirit world. While **Beyond the Veil** is active, you gain a moderate chance of resisting hostile spells.

#### ***Constitution Booster: Fade Burst***

You burst with energies drawn from the other side of the Veil, dealing spirit damage to all enemies nearby, particularly harming creatures from the Fade. The amount of damage depends on your willpower. Friendly fire is possible.

### **Constitution -200 CP (Discounted for Warrior)**

You now have an extra layer of protection, as you now gain a thin layer of surface tension around your body that reduces the power behind each strike. The faster the strike that's about to hit you the more durable the surface becomes, allowing a slow moving object to pass through without being affected, but faster moving objects such as high speed projectiles like an arrow are likely to shatter on collision with this surface tension.

#### ***Level Up Booster: Constitution Stat***

Constitution is now a Stat in your Leveling System, and each level up you gain 1 extra Stat point that you can put into any Stat. Your Constitution Stat directly increases the amount of damage you can take before fainting or dying, and also increases the level of your physical resistance. If you have the **Health Bar** Perk, every point in constitution will also increase your HP, allowing more damage to be taken.

### **Strength -400 CP (Discounted for Warrior)**

When expressing your physical might, you are now able to surround your body and anything you are touching with an energy structure that allows you to actively redistribute its weight as needed in order to wield it effectively. This means that when you lift a heavy but fragile object, you have to distribute the lift across the surface of the object and distribute its weight across your body. You can also redistribute the impact of any strike you perform so that the full weight of a slash or punch is put into a single point of impact.

#### ***Level Up Booster: Strength Stat***

Strength is now a Stat in your Leveling System, and each level up you gain 1 extra Stat point that you can put into any Stat. Your Strength Stat directly affects the damage you deal in physical combat, as increasing your Strength Stat increases the base damage from all Melee weapons and helps determine whether a melee attack is successful. Great strength is required to wield two-handed weapons or wear heavy armor.

### **DA Keep -600 CP (Discounted for Warrior)**

Using this **Narrative Perk** you will be able to tailor up to 300 important decisions made in the past of the Jump setting such as which romantic partners ended up together, what the results of famous events were and which choices were made choosing who died in specific circumstances. What these events are will depend on the setting, and when changing events, the resulting setting may be quite distinct from the canon events.

Once the decisions from the previous events have been selected, an animated video, describing the events of the previous installments will play, clearing up any canon errors. Any time the story branches, you can pause to change what decision was selected. After the video is finished, you can make changes or confirm and start the Jump.

### ***Inquisitor Booster: Skyhold Smith***

You are now able to integrate any other **Narrative Perk** you have into **DA Keep**, allowing you to better customize the Jump setting at each option, as well as how many options can be selected from at each branch. You can also use this to customize any weapon you possess by altering its creation history. When holding a finely forged weapon you can change what materials were used in its crafting, swapping them for any materials you have available even if the crafting process used is incompatible with the materials. This functionally allows you to create any weapon and swap pieces into the recipe, with the materials used swapped in determining the specific enhancements, attributes and/or powers that will be added to the new item.

### ***Champion of Kirkwall Booster: Stable***

You are now able to select multiple options in each important decision even if they would otherwise be incompatible, such as a character choosing to be in two places at once. This will cause the timeline to change as needed, depending on the continuity the character could learn to self duplicate or time travel allowing them to be in both locations at once alternatively the events could be spaced out allowing the character to arrive at both locations. How the conflict will be resolved will be explained to you before you can continue on to another decision. You can also use this Perk to swap out things in your possession with similar things that you own in other locations, such as the warehouse, allowing you to swap a chair for a horse or a jeep that you own.

## Rogue Perks:

### **Stamina -100 CP (Free for Rogue)**

Your body is now supported by an energy field known as SP (Stamina Points). Any physical activity you perform reduces your SP, but this prevents you from feeling the negative effects of exertion such as tiredness, shortness of breath or burning muscles while your body passively heals, allowing you to gain the benefits of the exercise. You are passively aware of how much SP you have left and when it runs out you will become reliant on your natural reserves of stamina until your SP recharges.

#### ***Level Up Booster: Stamina Bar***

Your SP is now integrated into your Leveling System, allowing you to display your SP in numeric values for yourself and others. Additionally, whenever you level up, your Maximum SP will increase slightly.

#### ***Level Up Booster: Cunning Stat***

Cunning determines how well you learn and how easily you find weaknesses in your enemy. Rogues benefit most from this statistic, as many of their class abilities and special attacks rely on subtlety or reading the target, not raw strength. Dexterity measures your agility, reflexes, and balance, the higher your dexterity the more likely you are to dodge incoming blows. Dexterity also contributes to the damage dealt by piercing weapons like daggers and arrows. Along with strength, dexterity also contributes to physical resistance as well as melee and ranged attacks, determining how likely a swing or shot connects with its target.

This allows you to regain any memories that you have lost or have been restricted, including those locked by drawbacks.

### ***Inquisitor Booster: Schematics***

You are now able to store copies of your Perks, Powers, and Abilities within your Golden Nug, this allows you to regain them should you somehow lose or dispose of them. Any magic you perform reduces your MP, but this prevents the negative effects of that magic such as spiritual corruption, sacrifice of self aspects or spell slots depending on the style of magic. You are passively aware of how much MP you have left and when it runs out you will become reliant on your natural reserves of magical energy until your MP recharges.

### ***Level Up Booster: Magic Stat***

Your magic is now a stat in your Leveling System, and each level up you gain 1 extra Stat point that you can put in any stat. The Magic Stat is the measure of a character's natural affinity for the arcane. This attribute is crucial for mages, since it directly increases a character's spellpower score, which determines the potency of all spells. The magic attribute also determines how effective potions, poultices, and salves are for all classes. Unsurprisingly, mages gain the most benefit from a high magic attribute; the magic attribute's modifier determines the mage's spellpower, which in turn governs the magnitude of a spell's effect, including damage. For characters of all classes, the magic attribute also increases the effectiveness of healing poultices, potions, and salves. A high magic score is required to wield high-level staves or learn certain spells. Magic also contributes to mental resistance.

### **DA Awakening -600 CP (Discounted for Mage)**

At the end of your Jump or when the main events of your jump Finish, you can use this **Meta Perk** in order to create a Sequel Jump. You may **Toggle** any loose thread from the Main Jump to continue in the Sequel Jump with any outstanding enemies, unfulfilled romances or incomplete prophecies to be resolved with the Sequel Jump allowing you to leave with everything completed. You also know how to put more stamina or magic into any spells, talents, skills, or abilities you possess in order to strengthen them. From this, you can make the damage output of any spell or talent larger in proportion to the increase of Stamina or Magic you put into it, such as doubling the damage of Shield Bash by doubling its Stamina you put into it or doubling the damage of Flame Blast by doubling the Mana you put into it.

### ***Champion of Kirkwall Booster: Legacy***

You can now use this **Narrative Perk** to create events, similar to scenarios that will take place during the main Jump, which will act as a setup to Sequel Jumps. During these events, you will find items and new methods to improve your power that will allow you to grow stronger in ways that you may not have found otherwise. Rather than simply knowing a Spell or Talent, you now understand the principles of them as though you had researched and developed the techniques or magic yourself. Thanks to this, you will have the capabilities to develop martial or magical processes, allowing you to create new talents and spells yourself.

### **Fade Touched +100 CP**

You are no longer a Drop-In or from an alternate Reality, you are instead a Local who has been touched by the Fade and gained the power of the Dragon Age world.

You will need to work out your Background with your Jump Chan, additionally you will lose all Items from this Supplement.

### **Background Mission +100 CP (Incompatible with “Qunari” or “Fade Touched”)**

It seems that you truly are from the world of Thedas as you must complete the prequel mission from your Origin before this Jump truly begins. Duncan will not appear within these events, as he has selected another Origin to be the Grey Warden of Thedas. At the completion of the storyline instead of Duncan arriving you will be pulled into a rift in the Vail pulling you into the Out Of Context world this Jump is set in and removing any complications or sicknesses you contracted in the Pre-Jump Event as well as fiat-backing any items you have gained that a player can gain in your mission as though you had purchased them.

### **Tainted +100 CP (Mandatory with “Grey Warden”)**

You have come through the rite of a Grey Warden and are now connected to the darkspawn tainted by their blood. This has made you immune to the Blight’s corruption, but you are still suffering from its effects. You will have bad dreams and your lifespan will be shortened by a third. Should an archdemon or Darkspawn be near, your nightmares shall intensify.

### **Dark Spawn +200 CP**

It seems that 50 of Darkspawn have been pulled into this world within an underground cave system somewhere on this planet, if left unchecked they could grow in number and become a plague.

### **Crow Calls +200 CP**

It seems you are not the only visitor to this world, as 10 Antivan Crows have been scattered across the land with you as their target. The Crows will know who you are and where you arrived, but will have to find and kill you themselves.

### **Calling for Blood +200 CP**

Others seem to have come to this world, as a cult of 10 Blood Mages have been separated and dropped in the setting. These Mages believe you are the enemy of all magic and killing you is the only way to save it. They will know who you are and where you arrived, but will have to find and kill you themselves.

### **Halt Apostate +200 CP**

In Andraste’s name 10 Templars have been brought to this world for a holy crusade. The Templars will be separated, with each having the goal to kill you. They will know who you are and where you arrived, but will have to find and kill you themselves.

### **Thin Fade +200 CP**

Unfortunately, demons now have access to this world. Though they do not have direct access, they can interact with the dreams of mortals. Those unlucky few with theoretical magical potential will become the targets for demons to make deals with so they can have a new body in this world.

### **Rifts to the Fade + 300 CP**

Your arrival in this world seems to have caused tears across the setting that allows small amounts of demons to enter into the setting over time. If left unchecked, armies could eventually come through the fade, or worse, warp the world into something unstable.

### **Fifth Blight +300 CP**

The Old God Urthemiel has been tainted and dragged into this setting, along with 30 Darkspawn and a brood mother. Under the Archdemon's guidance, these Darkspawn will be a true threat.

### **The Tranquil Solution +500 CP (Requires Mage)**

You have been through an unfortunate process as your connection to the Fade has been cut. You are no longer able to use magic for the duration of this jump, and you become completely emotionless. At the end of the jump, you will regain your emotions and your magic.

### **Class Limitations +300 CP**

It seems that you will now suffer from the restrictions that can come into play after DAO, and can no longer take any Perks or Items that are discounted for any Class other than your own.

### **Recurring Foe's +200 CP/+400 CP/+600 CP/+1200 CP**

Normally there would be no characters with access to this Jump Doc in your setting however with each purchase of this drawback, a new enemy from the dragon age series will appear at some point during your Jump, somewhere on your Planet with the goal of killing you.

For **+200 CP** they will have a Class, Race and Origin, **8 SP** worth of Skill's, **4 TP** work of Talents in their Class **-100 CP** and **-200 CP** perks.

For **+400 CP** they will receive a total of **16 SP** and **16 TP** as well as gain the **Rook, Champion of Kirkwall** and all their class Perks.

For **+1200 CP** they will gain all classes, all skills, all talents, all specialisation and all perks.

## **Generic Drawbacks:**

### **Accident Prone +100 CP**

You're prone to minor accidents that, while inconvenient, painful, or embarrassing, are not likely to kill you. You can expect any plans you make to suffer some kind of bad luck.

### **Acrophobic +100 CP**

You are terrified of heights, and anything deeper than a 10-foot drop will make you weak in the knees.

### **Age Problems +100 CP**

For the duration of this Jump, you lose all age resistance perks and powers.

### **Almost Entirely Dark +100 CP**

Has the sun gone out or something? Everywhere you go, it seems like it's so dark that you could mistake midday for early night.

### **Always Left Behind +100 CP**

Why do they keep leaving you behind?! You will find that Companions, allies, and benefactors are always ditching you to deal with things unrelated to your current predicament.

### **Amnesia; Jumpdoc +100 CP**

You lose all memories and knowledge of what you purchased in this Out of Context Supplement and any connected Jumpchain.

Each time you take this, a different, random local faction will consider you an enemy once they become aware of you. There isn't a limit to how many times this may be taken.

### **Antagonistic Timing +100 CP**

Your enemies keep showing up at inappropriate times.

### **Artificial Flashbacks +100 CP**

You have horrific flashbacks to horrible events involving your family and yourself. These events never actually took place, and the flashbacks happen randomly.

### **As You Know +100 CP**

Everyone expects you to already know what's going on, so don't expect to get any explanations.

### **At Least Buy Me Dinner First +100 CP**

Dangerous entities have a habit of taking an interest in you... a romantic interest.

**Awkward Affection +100 CP**

You are really bad at expressing your affection. Every attempt you make is extremely awkward and unpleasant for anyone who observes it.

**Bad Name +100 CP**

Everyone you meet will assume your name is something that you find insulting or annoying, and nothing you can do will change it in your mind.

**Behind Your Back +100 CP**

People always say horrible, hurtful things about you whenever they *think* you're out of earshot.

**Black Cat +100 CP**

Expect to see ill omens that seem to suggest terrible things coming your way. Mirrors break in your presence, lone magpies drop-dead at your feet, and other strange, malign portents follow you. Let's hope these superstitions are just that.

**Bounty +100 CP**

It seems you've pissed off the wrong people. You have a notable bounty on your head, and while it's not enough to get the big guys interested, it *is* enough to draw the attention of random thugs.

**Culture Shock +100 CP**

This world doesn't have the same cultural standards you're used to, which isn't a problem if you're quick to adapt. Unfortunately, you *won't* be. You'll constantly butt heads with anyone whose cultural norms and social mores are different from your own. While you can slowly adapt, they'll always rub you the wrong way, and your overall experience here will be much less enjoyable.

**Crop Rotation +100 CP**

Pests and poor weather have had a serious impact on the local farming industry. Food will be harder to come across and far more expensive as a result.

**Dark Memories +100 CP**

You will now gain memories of a lifetime of abuse since early childhood. Though these memories are false, you will not be able to differentiate them from real memories beyond knowing they are fake.

**Didn't Read The Instructions +100 CP**

You don't know how anything works and refuse to have anything explained to you. Using any sort of equipment will require trial and error.

**Disinteresting +100 CP**

You seem to emit an aura of monotony, causing everyone who doesn't know you to think you are a boring stick in the mud that wouldn't know fun if it hit them.

**Do you Feel Lucky, Punk +100 CP**

You keep unintentionally making pop culture references that no one else seems to recognise.

**Double Trouble +100 CP**

You will always encounter twice as many enemies in the world, because every foe you face will have one identical copy that only you can see. The worst part is that this seems to be a Schrödinger situation, as the *real* one is never the one you defeat first.

**Easily Deceived +100 CP**

You're too trusting, willing to believe almost anything you're told, and become confused when you're told conflicting things.

**Elites Everywhere +100 CP**

Every group of opponents that you face will have at least one additional elite member.

**Extended Stay +100 CP**

You can increase the duration of this Jump by ten years. You can take this a maximum of ten times, increasing it by up to one hundred additional years.

**Faulty Gear +100 CP**

Any tools you attempt to use will rust and decay at an accelerated rate, and you won't realize how severe the damage is until it is too late to repair.

**Friend List +100 CP**

Random people claiming to be your friends keep showing up, but you won't remember any of them. Although some of them may be, most are trying to maliciously use you for their own benefit.

**Friends to the Four Winds +100 CP**

Instead of arriving at your Location Choice, your Companions are now scattered randomly throughout the setting. They won't be able to enter your Warehouse until they've found either you or one of your properties.

**The Glitch +100 CP**

Technology randomly fails around you, normally when you need it the most. You might be able to jury-rig a quick repair, but you'd better act quickly because while this won't be instantly fatal, it will make things more dangerous.

**Gore Galore +100 CP**

It seems that every creature you kill has ten times the amount of blood and viscera that you would expect, making it a real possibility of drowning in the blood of your enemies.

**G-Rated +100 CP (Incompatible with “X-Rated”)**

This Jump is now a family feature... or so it seems when it comes to you. Any attempts to swear, drink alcohol, take recreational drugs, have sex, kill someone, or anything that might warrant a PG rating will be averted at the last moment – often painfully and humorously.

**Heroic Sayings +100 CP**

You have several quotes and sayings that always come across as annoying or cheesy, which you unintentionally use every time you try to talk to others.

**Hidden Knowledge +100 CP**

People keep forgetting to tell you important things until it's *just* about to become relevant.

**Hideous Haircut +100 CP**

You have a haircut that everyone finds disgusting. They'll make comments about how ugly it is, and nothing you do will change it.

**The Holiday Special +100 CP**

Whenever you reach an in-Jump holiday, the world around you will start to follow the tropes of a Special Holiday Episode. This will happen for every main holiday, such as Christmas or Halloween, and at least once during the Jump for each lesser-celebrated holiday like May Day or April Fools' Day.

**Honorbound +100 CP**

You always do things as honorably as possible, such as informing someone if you intend to arrest (or kill) them before giving them time to surrender (or prepare) before taking action.

**How Do I Keep Falling Into These Situations? +100 CP**

Anytime you're not busy with something - whenever you aimlessly wander around, going for a jog, or you just have free time - you'll find yourself walking right into the middle of active trouble.

**I Must Nap +100 CP**

You need at least seven hours of sleep per day, or you'll feel exhausted.

**I Spy +100 CP**

Your enemies can easily spy on you without being detected.

**In Another Castle +100 CP**

Each time you attempt to complete a task or objective, you will find that you have been tricked and will have to repeat the process all over again. You'll not only forget this Drawback, you'll also forget every previous time you've been affected by it whenever you start a different task. This only triggers once per task and will not become an endless loop of deception.

**Inconveniences +100 CP**

You will constantly encounter minor obstacles that are uncomfortable to deal with.

**Kick The Cook +100 CP**

You are a terrible chef and everything you cook is disgusting. You can't even cook toast without making it *monstrously* vile.

**Knowledge Lockout +100 CP**

You lose all of your knowledge of the setting's universe and its continuities once you start the Jump.

**Language Barrier +100 CP**

You do not speak the local language, and no one here knows what you're saying until you learn.

**Loser +100 CP**

Anyone who doesn't know you will automatically expect you to fail at whatever you are trying to do. This will cause those who mean well to push you to work harder and those who don't mean well to attempt to discredit you.

**Low Budget +100 CP**

Something about this world just seems... *cheap*, with flying wires, plastic shields, old school lights, and tatty-looking monsters.

**Magnet For Misfortune +100 CP**

You have *terrible* luck. You're almost constantly hit by random, unpleasant, and painful bouts of misfortune.

**Money Money Money +100 CP**

Your avaricious desire for money and other symbols of wealth leaves you willing to go to extreme lengths to get more.

**Never Mind My Head Trauma +100 CP**

People don't care when you're injured.

**Nightmare +100 CP**

Every night, you'll fall asleep and suffer terrible dreams.

**No Hard Feelings +100 CP**

There's one random person who constantly tries to outdo you... And somehow, they keep succeeding before rubbing it in your face.

**Optician Required +100 CP**

Your eyesight is highly restricted, as you can not see anything other than indistinct blurs without wearing glasses. No form of healing can remove this drawback, and any form of contact lens will feel incredibly itchy.

**Orphan +100 CP**

Your in-universe parents are dead, and you are an orphan.

**Pixelated Objects +100 CP**

This pixelation in this Jump would shame an NES. Everything is blocky!

**Plot Anchor +100 CP**

Every plot seems to revolve around you, and no matter what you do, you will always be dragged into the story.

**The Pollen +100 CP**

You have hay fever, and it's really, *really* bad. Just a handful of flowers could leave you with blurred vision and sneezing for hours.

**Prove Your Worth +100 CP**

Every time you try to do anything, it seems that everyone wants you to complete an arbitrary task to somehow prove your worthiness. This won't be hard, but it happens all the time for even the smallest things. It may even cause you to get stuck in a worthiness spiral, requiring you to prove your worth to get things needed to prove your worth for some totally unrelated task.

**Recurring Foe +100 CP**

You have an enemy whom you have no way to convince to leave you alone. Each time they encounter you, they learn more about you and how to better face you in the future.

**Rough Childhood +100 CP**

You were not as lucky as some people. Your in-universe childhood was - or will be - abusive and painful to such a degree that you will be affected by it, even if you didn't really live through it. Gain an extra **+100 CP** if taken with **Just A Child**.

**Scarred +100 CP**

You either have horrible burns or horrible wounds, neither of which you can hide. You appear monstrous to others, causing most to feel deep fear at the sight of you.

**Scripted Encounters +100 CP**

You'll run into whatever threat you're dealing with more often. You won't automatically become a priority target, but sheer proximity is likely to put you at risk.

**Shameful Attraction +100 CP**

The worst kind of perverts keep seeking you out and trying to get you to fulfill their fetish.

**Shy +100 CP**

You find that it's incredibly difficult to talk with people you want to be friends with.

**Sickly +100 CP**

You have a poor immune system and are more susceptible to illness. You'll get sick at least once a month.

**Silent Night +100 CP**

Unfortunately not. An annoying narrator who constantly insults you and reiterates things that you already know will rhyme in your inner ear every. Single. Christmas.

**Silent World +100 CP**

The world seems emptier than it ought to be. You don't know what happened, but the population of your starting planet (or nearest equivalent) is *drastically* lower than expected. After including every named character, the population is at most **10%** of its expected total. If you would normally see eight billion humans, you can instead expect to see as few as eight *million* instead.

**Simple Minded +100 CP**

You find it difficult to understand somewhat complex topics, and you have trouble remembering when holidays are.

**Stalker +100 CP**

A random, ordinary human knows *everything* about you and is *obsessed* with you. They're also protected from any Perks or Powers that would help you find them quickly.

**Stranded +100 CP**

Instead of whatever your normal starting location would have been, you find yourself in the middle of a deserted island somewhere in an ocean.

**Team Up +100 CP**

It seems that you can't go anywhere without some random person showing up and joining you. What's worse, *they* always seem to get any of the praise you may have earned, and *you* always get all the criticism for the group's failures.

**They Heard You +100 CP**

Any time you say something mean about someone, they'll overhear you and probably get upset. You will forget you took this Drawback.

**They Took My Loot! +100 CP**

Any time you leave any treasure unguarded, expect thieves to show up and steal it.

**This Is A Holdup +100 CP**

For some reason, every two-bit henchman, sidekick, minor minion, and comedy relief character thinks they can kick your ass, and they're going to go out of their way to prove it! Expect to get mugged *a lot*.

**This Is A Really Good Book +100 CP**

Whenever you try to read a book, you get sucked into the narrative and ignore everything happening around you.

**Thugs For Days +100 CP**

Every day, a minimum of ten random thugs will show up and target you.

**Touch Of Madness +100 CP**

Things keep happening that leave you thinking you're going crazy... and maybe you are, but not because of this Drawback.

**Turn-Based +100 CP**

Whenever you enter into a fight with someone, you will find yourself transported into a weird pocket dimension where you are only able to take an action after each of your opponents in a fight.

**Two Of A Kind +100 CP**

People keep drawing parallels between you and other people, and these comparisons are *not* flattering.

**Unknown Rival +100 CP**

It appears someone has taken a shine to you, but not in a good way. They have abilities or a similar area of expertise to you, and they're *not* taking it well. They won't do anything to outright harm you, but they *will* try to one-up or challenge you, and there's not much you can do to get rid of them. If you beat them at their own game, they'll double down. If you try to help them beat *you* to get them to leave you alone, you'll come out on top purely by accident, which will, again, spur them to double down.

**Unnecessarily Slow +100 CP**

Everything that happens here seems to take forever, moving at a snail's pace. I hope you're a patient person.

**Unwanted Crossover +100 CP**

This drawback acts like a magnet for other settings, resulting in strange individuals from other worlds popping up and potentially causing us issues. These individuals tend to have power consistent with the power level of the chosen setting, but you won't have any way of knowing when someone new has shown up.

**Wanted +100 CP**

You have a criminal record somewhere out there. It has a surprisingly high bounty, but not so much that you will be sought out. People *probably* won't go after you as long as you stay away from wherever your wanted poster is.

**Wearing Underwear on the Outside +100 CP**

You have terrible dress sense, with everything you wear being the worst possible combination of clothing.

**The Weirdo +100 CP**

Everyone seems to think that you are a strange individual, and they will go out of their way to avoid you unless they actually need to speak to you.

**What's His Name? +100 CP**

No one seems to remember your name, so you've been given a nickname that really winds you up. What's worse, most people think that it's your actual name.

**What's That Smell? +100 CP**

No matter where you go, no matter what you do, something always smells slightly off. The source of the smell varies depending on your location, but it's always distracting.

**What's Wrong With His Face? +100 CP**

Your face has been messed up, leaving you grotesquely ugly and near-unrecognizable to everyone who knows you. Those with a weak stomach may be sick merely at the sight of you.

**Where Did I Go Wrong? +100 CP**

You can't tell the difference between confidence and arrogance.

**Why Am I Naked +100 CP**

You start this Jump naked, and your clothing becomes incredibly fragile as it keeps getting destroyed, leaving you in the nude.

**X-Rated +100 CP (Incompatible with “G-Rated”)**

Things in this Jump are a little more... *explicit* than normal. Sex, drugs, murder, and a lot more are out there, and it's almost like this world is desperate to show it all off.

**Amnesia; Local +200 CP**

Until the end of this Jump, you can not remember the events of the setting you have entered.

**Amnesia; Personal +200 CP**

You have no memories of your personal life before entering the current Jump, but this does not affect academic, social, or media knowledge.

**Amnesia; Jumper +200 CP**

You lose all memories and knowledge you gained since beginning your first Jumpchain.

**An Accident +200 CP**

You keep accidentally falling into compromising positions.

**Betrayal +200 CP**

You keep trusting people who don't deserve it, and they keep betraying you.

Whether you're just that naive or it's against your better judgment, you keep trusting people who don't deserve it, and they keep betraying you.

**Bigger Boss +200 CP**

Any time you defeat an enemy, not only will their superior know, they'll also know *how* you did it.

**Blinded +200 CP**

You have lost your eyesight and will not regain it this jump.

**Dark Minions +200 CP**

Some odd physical embodiments of evil will seem to appear everywhere, and they always attack you. No one else ever seems to see them or interact with them, but those things seem to be drawn to you like ants to sugar. If the setting already has creatures of darkness or evil, they are now also drawn to you en masse.

**Dead Or Alive +200 CP**

You have a local criminal record, and anyone who recognizes you as the target may attempt to turn you in for the bounty.

**Demonic Disturbance +200 CP**

Your presence has caused discomfort for the demonic entities within your chosen setting. They will attack you on sight and may go out of their way to make sure any acts of evil in your area are directed towards you. If demons didn't exist in the setting beforehand, they do now.

**Discount Budget +200 CP**

Anything you get your hands on is always the cheapest alternative option.

**Fighting Myself +200 CP**

At least once per week, you will appear within an empty space outside of time and must fight to the death against a fake copy of yourself. This copy will have all of your Perks, Items, and Abilities, but regardless of how the battle goes, you will not truly die. You will still feel pain, however.

**Friends From Beyond Your Dimension +200 CP**

A powerful godlike being will interfere in your life, making it more interesting or fun for them to observe.

**Godly Distractions +200 CP**

Your presence has drawn the attention of the universe's local divinity. Though they will not take direct actions against you, they will pull strings to make things difficult for you until you choose to confront them. If no gods exist within the Jump continuity, your Jump-chan may choose to retroactively add the Gods, such as the Greek Gods, to the setting for this Drawback.

**Hormone Problems +200 CP**

You have a heightened state of arousal that makes it so that you are constantly in the mood and find those you are attracted to far more attractive.

**Lemming Friends +200 CP**

All of your in-universe allies gain an unfortunate lack of self-preservation, causing them to take actions that are obviously stupid or will likely end very poorly for them.

**I Hate Fighting Me +200 CP**

At least once a week, you will have to fight a counterfeit version of yourself. Some will be shapeshifters, artificial replicas, and occasionally incomplete clones, but none of them will have any Perks, Powers, or Items gained from a Jump-Doc.

**Instructional Video +200 CP**

Whenever you do something for the first time, you will be forced to watch a long, boring tape that doesn't actually explain anything.

**Is this Blood +200 CP**

You have an unfortunate habit of stumbling upon fresh corpses without any excuse or explanation.

**Lemming Behaviour +200 CP**

You lack any self-preservation. No matter the danger, no matter the threat, you seem to face it as though you are invulnerable. The greater the chances of you being crippled, maimed, or killed, the more excited you become.

**Local Scale +200/300/400/600/800 CP**

Your power, and perhaps your growth, has been restricted to align with the locals. Any Perks or Items you possess that exceed this power will be weakened if possible or otherwise made unavailable for you to use until you reacquire through normal means power roughly equal to your lost or weakened Perks and Items.

For **+200 CP**, you start the Jump with power equal to the local protagonist.

For **+300 CP**, your initial level of power will be capped at the general range of the supporting cast at the start of the fictional setting.

For **+400 CP**, your level of growth will be capped to match the growth of the local protagonist.

For **+600 CP**, you'll instead be limited to 90% of the scale of growth of the local protagonist.

For **+800 CP**, your scale of growth will be limited to 85% of that of the local protagonist, while your strength shifts so that it is never enough to make you as powerful as the story arc's main villain.

**Looking For Help +200 CP**

You often struggle to find allies and will often find yourself alone without anyone to trust.

**Mirror Match +200 CP**

It seems that you have a clone out there causing chaos. They will have all the perks and race options you picked in this Jump, but their minds are empty.

**Nightmares +200 CP**

You will suffer terrible nightmares showing you the dark and twisted actions that your enemies might be performing while you are helpless. You can't separate these dreams from reality.

**Perfection +200 CP**

You are now a perfectionist and will refuse to accept anything less than perfection.

**Pet Food +200 CP**

Creatures of every shape and size will want to eat you, from animals as small as a flea to ones as big as a lion. The only exceptions to this are sentient creatures such as humans.

**Pig +200 CP**

You are always hungry, with no amount of food truly satisfying your appetite.

**Poor Underestimation +200 CP**

You forget this drawback, and whenever you underestimate an opponent, they will get stronger.

**Publicity +200 CP**

Every mistake you make will become public knowledge, and every negative misinterpretation of your actions will be highlighted. It's almost like someone is trying to make you look bad.

**Read People Like A Brick +200 CP**

You can't read people, you can not understand people's emotions, and you often misconstrue what they mean, causing you to be oblivious to the intentions of others.

**Sore Thumb +200 CP**

There is something odd about you that makes you seem noticeable as a foreign being to anyone who deals with anything not native to Earth or this dimension.

**Stealthless +200**

You are very bad at sneaking.

**The Bad People +200 CP**

For some reason, everybody is an asshole to you. They will treat you like dirt, and if you dare refuse to do anything for anyone, don't expect any kind of help from them ever.

**The Good People +200 CP**

It seems that everybody wants something from you. They want you to get their cats out of trees or fetch them milk for their tea, and if you refuse to do a task for someone, you're the asshole. On the bright side, if someone has already given you a task that you are currently working on, people are less likely to give you new tasks.

**Thou Shalt Not Kill +200 CP**

You are not capable of killing anyone, from the weakest of insects to the most dangerous of gods, thus giving anyone who may be killed by you selective immortality.

**Too Soon +200 CP**

Every attempt at a romantic confession or to kindle a relationship will crash and burn in a humiliating way.

**Too Nice +200 CP**

You tend to be overly accommodating of others, allowing them to dictate or make decisions for you. While most of the time this will be simple things, such as what to eat or where to go, if left unchecked, you could find others determining your whole life for you.

**True To Myself +200 CP**

Alternative versions of you from the future keep showing up and causing disturbances before disintegrating.

**What The Heart Wants +200 CP**

You have a massive crush on one of the main characters, as appropriate for you. You will discover which one when the jump starts.

**Wider World +200 CP**

This world is bigger than you would normally think, but this also makes it more dangerous. There are more magical schools, more super martial arts, more alien races that will target the planet, more magical creatures that will show up to cause trouble, and more that would normally not be shown, and all of them seem to think they should involve themselves in the plot.

**You're A Joke +200 CP**

No matter what you do or how effective you are, everyone will see you as a failure and treat you like a joke.

**You're Only Paranoid if You're Wrong! +200 CP**

You expect every word to be a thinly veiled threat, every offer to be a chance of betrayal, and every moment of weakness to be an opportunity to be attacked.

**Amnesia: Pre-Jump +300 CP**

You forget all memories and knowledge that you have gained prior to this Jump, but you retain all knowledge you will have gained from your In-Jump origin and background. This essentially makes you your In-Jump character after they gained your Perks, Powers, Items, and Abilities.

**Cat Got your Tongue +300 CP**

You are now mute and unable to speak verbally for the duration of this jump.

**Competent Enemies +300 CP**

All of your enemies will get situational intelligence whenever you face them, making them twice as competent.

**Crippled Limbs +300 CP**

This can be taken up to four times, with each time affecting a different limb for the duration of this Jump.

You may select from either a left or right crippled arm, with each crippled arm lowering your hand-to-hand damage and accuracy with all weapons.

You may select from either a left or right crippled leg, with each crippled leg severely lowering mobility during combat. With one crippled leg, movement speed is halved, and with both legs crippled, movement speed is reduced to one-tenth.

**Death Takes a Holiday +300 CP**

Your enemies now seem to have some form of immortality, no matter what happens to them. While someone remains your foe, they can't die. None of your allies or enemies can slay them either. However, they can be crippled or imprisoned.

**Everything Is Fine Now +300 CP**

There are consequences for your actions, and it seems that after each battle, you will need to help clean up the mess.

**The Ghosts Of Murder's Past +300 CP**

Anyone you kill in this Jump will haunt you in the most annoying way possible.

**Holy Problems +300 CP**

You have an aversion to all religions and will feel weak whenever you come into the proximity of any religious symbols or objects.

**I Saw You Barely Over A Year Ago +300 CP**

Your sense of time is terrible. You can't tell if a week has gone by or eight years.

**I'm Going To Take A Walk +300 CP**

You seem to be a walking magnet for issues, as every time you go for a simple walk, you will be pulled into the middle of some kind of event, from a simple robbery to a deep, dark plot.

**I've Come To Duel You! +300 CP**

Your list of enemies has expanded, growing to include beings from other settings. Perhaps you will face Egyptian pharaohs, strange children, furry animals, or something stranger.

**Just A Child +300 CP**

Instead of starting this jump as an adult, you will start it as a newborn baby. You will not start the jump time until you are socially considered an adult, at which point the Jump time will start, and all other non-narrative drawbacks will begin to activate.

**Living In Exciting Times +300 CP**

Completely random but exciting things will nearly constantly occur around you. You can try to avoid interacting with them, but fate will often try to involve you regardless.

**Outside Problems +300 CP**

You keep getting stuck in situations outside the regular continuity, such as monsters, demons, and extraplanetary problems that never came up in the original story.

**Part-Time Janitor +300 CP**

There are consequences for your actions, and after each time events you are part of make a mess, you will have to help clean up.

**Prepare For Evasive Actions +300 CP**

Any time you are in a form of transportation, it will be attacked.

**Split-Personality +300 CP**

It seems that you are not alone in your own head. You have an alternative persona within you, one who cannot take control unless you lose control. They seem to be the antithesis of you, but they seek out what desires you refuse.

**Today's Kind Of A Bad Day +300 CP**

During this Jump, you will have one really bad day. Someone really strong will show up, beat you up, kidnap someone you care about, and no matter what you do, you will definitely die at least once. Let's hope you have a 1-UP.

**Villain of the Week +300 CP**

It seems you're a magnet for odd enemies, as every week a new enemy will show up to battle you, ranging from a weakling with delusions of grandeur to those who are a genuine threat to you.

**Where are the Instructions +300 CP**

You have no idea how to use your perks, powers, or abilities. You require trial and error to figure out the basics, let alone the full power.

**You're A Right Git +300 CP**

Everyone thinks you're an arsehole and a cheat, and nothing you can do will prove this wrong.

**You Get One More +300 CP**

If you do something annoying more than twice, you will get punished. How, why, by whom? Well, that will be situational.

**Alone +400 CP**

For the duration of this Jump, you can not import any out-of-Jump companions or followers.

If this document is taken as a Supplement, this drawback will not affect the companions or followers gained in the attached Jumpchain.

You must reserve this drawback, with the effects of the drawback taking place for the entire Jump.

**Butterfly Wings +400 CP**

Your mere existence will cause massive butterfly effects. The canon events are no longer protected, and every action you take will cause reactions that change the plot dramatically.

**Empty Handed +400 CP**

For the duration of this Jump, all out-of-Jump Items and Warehouse options other than your Body Mod are blocked.

If this document is taken as a Supplement, this drawback will not affect the items gained in the attached Jumpchain.

You must reserve this drawback, with the effects of the drawback taking place for the entire Jump.

**Find And Seek +400 CP**

Every year, you will gain a list of 12 items that will be scattered around the world. You will gain basic information about them, but failure to find them within a year will count as a jump failure.

**Here Comes The Bad Part +400**

Whenever you get new information, there will always be a bad part to it.

**I Am Bound By My Word +400 CP**

You are bound by any promises you willingly make.

**The Importance Of Education +400 CP**

You will be required to attend 10% of your total time in this jump inside an educational institute. Failure to do so will count as a jump failure.

**Known Enemy +400 CP**

Someone doesn't like you. Maybe you wronged them, maybe your friends wronged them, or maybe there's just a huge bounty on your head. The point is, this person is going to try to kill you, and they will not stop trying to kill you until you or they are dead. They cannot be reasoned with, attempting to pacify them through supernatural means will not work, and while restraining them will buy you time, they'll find a way out.

**Lost Or Found +400 CP**

Your possessions keep winding up in the hands of the worst person to have them. Let's hope it's not world-shattering.

**Powerless +400 CP**

For the duration of this Jump, all out-of-Jump perks, powers, and abilities other than body mods are blocked.

If this document is taken as a Supplement, this drawback will not affect the perks gained in the attached Jumpchain.

You must reserve this drawback, with the effects of the drawback taking place for the entire Jump.

**That Wasn't So Difficult +400 CP**

You will forget this drawback, and any time you act overconfidently from solving an issue, a more difficult issue will occur.

**Where Am I? Why Am I Here? +400 CP**

You keep getting randomly teleported to locations to complete tasks without any idea of where you are or why you are there.

### **From the Depths of Hell +400/800 CP**

For **+400 CP**, a powerful foe you've faced in a previous Jump has been brought to this Jump. They gain access to a random Jump-Doc that they can purchase Perks, Powers, and Items from as though they were a Jumper, and they want vengeance.

For **+800 CP**, they gain access to two random Jump-Docs instead of one and a random Out of Context Supplement.

### **Deathbound +500 CP**

Every year, you will be stalked by death and suffer from dangers that are guaranteed to kill you at least once a year.

### **False Friends +500 CP**

At least 12 times a year, an imposter will replace one of your friends or allies. They are almost identical to the person they're replacing, but they will have malicious intentions.

### **PS1 Game +500 CP/+1000 CP**

There is something wrong with this jump. Instead of it being the normal version of the universe, you are instead in a PS1 game.

For **+500 CP**, this means that what you see of the world will be blocky with flat textures on the floors, walls, and people who are now complex NPCs.

For **+1000 CP**, the entire world will function as a PS1 video game with events forced to stick to a linear plot with optional time-sensitive subplots. You will not gain a system for extra lives or any of the in-game power-ups. However there may be collectibles that do nothing.

You must reserve this drawback, with the effects of the drawback taking place for the entire Jump.

### **Auto-Punishment +600 CP**

Every time you make a mistake, you unintentionally react violently, harming yourself as punishment. This results in minor wounds and injuries that build up over time. These injuries heal at a "normal" human rate, despite any healing abilities you might have.

### **So Weak +600 CP**

At some point during this Jump, you and all your allies will be defeated. There is no way around this. You will lose, and you will all be captured.

### **We Humans Are Full Of Surprises +600 CP**

The humans of this world are not necessarily what is expected. There are now mutants, metahumans, or otherwise superpowered people.

### **Boss Rush +600/1000 CP**

Post-Jump, you will be forced to have a 1v1 fight against every enemy you have faced in the Jump, one after another. You will not be able to move on to the next jump until you have beaten them all. For **+1000 CP**, all the opponents will have their raw power to reach yours, but they won't gain any extra training or proficiency.

### **AU Continuity +1000 CP**

You are not in the canonical story, but an alternative universe randomly created from all the FanFictions and Fan Theories.

### **In Context Foe +1000 CP (Requires 2 or more of the following Drawbacks: "Powerless", "Empty Handed", "Alone")**

To take this drawback, your jump setting must have a Jumpchain that you have not used. A new opponent will be added to this jump, with their only goal being to destroy you. They will have double the total **CP** you gain in this Document, which they can spend however they wish in the unused Jumpchain.

### **Random Setting +1000 CP**

By taking this drawback, you are no longer allowed to select the setting of your Jump; instead, you must use one of the following links and choose one of the six options it provides.

If that setting has a Jump Document already, you may use that Document for this Jump.

You may test each link as many times as you wish before purchasing it, but you must pay for the link before you click it when selecting a setting, and you can't change your mind afterwards.
